PERSONAL PROJECTS

Project : Employee Management System

Developed an Employee Management System using Spring MVC, Hibernate ORM, MySQL, JSP pages, and JavaScript. This system manages employee data with CRUD operations and ensures efficient data persistence with Hibernate ORM and MySQL. The user interface is created using JSP pages and enhanced with JavaScript for improved interactivity. The project demonstrates proficiency in backend development with Spring MVC and Hibernate, as well as front-end development using JSP and JavaScript.

Project : Smart Contact Manager

Developed a web-based contact management system, Smart Contact Manager, using Spring Boot, Spring Security, Thymeleaf, jQuery, HTML, CSS, and JavaScript. The application provides secure user authentication and authorization, a responsive and user-friendly interface, enhanced interactions and dynamic content with jQuery, and efficient search and sort functionalities for managing contacts.

Project : Exam Portal

Developed an exam portal website using Spring Boot, React, Tailwind CSS, Material UI, React-Hook-Form, Redux JS Toolkit, JWT, Spring Security, and REST API. This application facilitates secure user authentication and authorization with JWT and Spring Security, and offers a responsive, modern interface using Tailwind CSS and Material UI. Key features include dynamic form handling with React-Hook-Form, state management with Redux JS Toolkit, and efficient RESTful communication between frontend and backend services.
